TRADING HOURS
Monday to Friday
7.30am - 5.00pm

Service is the key Large volume or short print runs, quality is paramount and schedules, however tight are strictly adhered to. Our staff are all specialists in their field and every one is committed to giving you a worry free experience.

Welcome to Willprint...

Willprint Shepparton was founded in 1996, when Ian and Jan Almond purchased the existing business of Max and Thelma Williams, trading as S. M. & T. A. Williams. This business was started from nothing in an earthen floor shed in Numurkah Road around 1960.

Ian Almond worked for Max and Thelma from 1978 until the time of purchase in 1996. The company had six other employees at the time of the changeover. From 1996, the company has grown to an average staff of 16-18, has moved into larger new premises at 51 Drummond Road in August 2001, and from there has continued its growth.

What can we do for you?

Willprint Shepparton can supply a total printing solutions package to its customers. From concept and design to a quality finished product is our aim for all our customers. However, if you have your designs already or wish to use other design sources, Willprint Shepparton is only too pleased to handle printing and finishing requirements.

Our pre-press and design service has most software options covered, and we try our best to keep abreast of the latest software updates. All other requirements can be handled by a reliable Service Bureau.

Our staff have an extensive list of achievements, including Lithographic Institute of Australia Apprentice of the Year, RMIT Environmental Achievement award, along with years of experience.

We have offset, digital and letterpress press power to handle your printing requirements. With 10 presses and associated equipment we can produce your printed goods in quick time.

Most of our finishing processes are handled in-house, with all other requirements being supplied by reliable, competent sources.

Willprint Shepparton is the winner of two prestigious Business Achievement Awards in the category of Printing and Allied Services. We have also taken out two Printing Industries Craftmanship awards for "sustainable green printing".

Please take the time to study this catalogue to fully appreciate the vast range of services and products Willprint Shepparton can offer you. Please drop in to discuss your requirements, or call and we will come to you.

Mission Statement

Willprint Shepparton is founded on service to the customer, supplying quality printing at a competitive price, helping customers find solutions to their printing requirements. Our vision is to build and operate a highly successful company, delivering employment to its staff in a friendly, happy environment, while supplying a quality product to our customers.

What we print it on...

OFFSET

Speedmaster(s)

These fellas are fast, damn fast.

Great for large runs, has exceptional print quality and unmatched accuracy in printing.

Ever had a flyer for a pizza joint in the mail? Probably from a Speedmaster.

GTO

Just like the car of the same model, the GTO has been the backbone of printing since the 60's. Back in the day these guys were used for everything - and today? Well the same applies. We can't do some of the printing jobs without them. Docket books? Printed on a GTO, it doesn't matter if you get the book printed here in Shepparton, or in Pakistan, the GTO reigns as the go-to press.

LETTERPRESS

Cylinder

If you think technology will replace everything well you might be wrong. Since its debut in 1963 the cylinder is still arguably the best way of creasing, cutting and scoring your work.

Need a presentation folder die cut? You will need a cylinder.

Platen

This weird looking contraption has been around since the 1900's. It embosses and cuts to shape, the same as the good ol' days. You have to know your stuff to operate one of these, but the results are still accurate and as impressive as anything made today. We can still print letterpress on this little baby.

DIGITAL

Ricoh 7100

The allrounder, great for a bit of everything. Excellent print quality..

What it lacks in speed, this little gem can make up for with its tricks.

No plates no drying time, means smaller print runs are its bread and butter. Time poor? Only need a few? This is your solution.

Konica C951

This is the workhorse of the digital world, if you have ever had a manual, learner guide, or anything with a lot of text, this is the machine that produces it. Sadly, this is one colour, black. But as we know when you are sitting in class going through the content of the course or similar, black is all you need.

OTHER BITS AND PIECES

Big guns aside, there is a heap of machines that we use everyday to get your work done. Laminators for a stunning protective finish, bookbinding machines for a professional feel and look to name a couple.

Many of our machines take years to master, dedicated people of craft and trade combine to bring you the best possible result with your printing - the machines are only a tool.

Really that's the difference, our knowledgeable skilled staff, who know what they are doing.

Leaving your brand, your image, your marketing strategy, or reputable name in the hands of a year 11 student, who works part time at the copy shop, may not be the most economical way of completing the job.

We back our service any day, its as simple as that. Just give us a try!
